Senior Data Scientist / AI Team Lead

PROFESSIONAL SUMMARY

Accomplished Senior Data Scientist with over 8 years of experience designing, deploying, and scaling enterprise-grade AI/ML models that drive business transformation. Proven track record of leading cross-functional teams to deliver predictive analytics engines, large language model (LLM) applications, and real-time recommendation systems. Expertise in productionizing machine learning workflows, optimizing cloud infrastructure costs, and converting complex data into high-impact executive strategies.

TECHNICAL SKILLS

Languages & Core:	Python, R, SQL, Java, C++, Bash, Git
Machine Learning:	PyTorch, TensorFlow, Scikit-Learn, XGBoost, Keras
Data Engineering & Big Data:	Spark, Hadoop, Hive, Kafka, Airflow, Snowflake
Cloud & MLOps:	AWS (SageMaker, EC2, S3), GCP, Docker, Kubernetes, MLflow
Analytics & Visualization:	Tableau, PowerBI, Plotly, Pandas, NumPy, Statsmodels

PROFESSIONAL EXPERIENCE

Lead Data Scientist <i>TechInnovate Solutions — New York, NY</i>	Jan 2024 – Present
- Architected and deployed an enterprise real-time recommendation engine using PyTorch and AWS SageMaker, lifting customer conversion rates by 22% and generating \$4.2M in incremental annual revenue. - Spearheaded the migration of legacy analytics infrastructure to an Apache Spark and Snowflake data lake environment, cutting query latency by 45% and reducing infrastructure overhead by \$120K annually. - Directed a high-performing team of 5 data scientists and MLOps engineers, establishing CI/CD deployment pipelines that accelerated model time-to-market from 6 weeks to less than 5 days. - Implemented an internal generative AI chatbot utilizing LLM fine-tuning and retrieval-augmented generation (RAG), saving customer service agents an average of 1.5 hours per day.	
Senior Data Scientist <i>DataInsights Inc. — San Francisco, CA</i>	Mar 2021 – Dec 2023
- Engineered an advanced XGBoost-driven fraud detection model that processed over 10M daily financial transactions, lowering false-positive rates by 34% and preventing millions in fraudulent losses. - Formulated predictive customer lifetime value (CLV) and churn frameworks using survival analysis, enabling the marketing department to orchestrate targeted retention campaigns that slashed churn by 18%. - Conducted rigorous A/B testing configurations across web platform features, analyzing millions of user sessions to optimize conversion funnels and product positioning.	
Data Scientist	Jun 2018 – Feb 2021

Quantum Analytics — Boston, MA

- Built and maintained end-to-end ETL pipelines handling multi-terabyte datasets using Python, SQL, and Apache Airflow.
- Developed time-series forecasting models (ARIMA, Prophet) to optimize multi-location inventory management, decreasing warehousing stockout frequencies by 15%.

EDUCATION

M.S. in Data Science New York University	2018
B.S. in Statistics & Computer Science University of Michigan	2016

CERTIFICATIONS & AWARDS

- AWS Certified Solutions Architect – Professional
- Google Cloud Certified Professional Data Engineer
- Featured Speaker at the Annual Global Data Science Conference (2025)
